

## WHAT PRODUCTS DO WE OFFER?

Casa Verde Designs is an authorized reseller or has a trade relationship with the manufacturers or distributors for a wide range of green design and home improvement products. If a green product that you have heard about is not on this list, please contact the showroom. We are always adding new products to our showroom offerings.

In selecting offerings for our showroom, we have considered a wide range of criteria including how a product uses resources and how it affects indoor air quality.

- Uses post-consumer recycled content
- Uses pre-consumer recycled content
- Incorporates material diverted from the waste stream
- Contributes to healthy indoor air quality, by reducing off-gassing & moisture issues
- Blocks the introduction or spread of indoor contaminants
- Promotes energy conservation by reducing energy or encouraging conservation
- Reduces or eliminates material use
- Reduces or eliminates energy use
- Enhances or improves natural daylight in a space
- Uses raw materials that have been produced using sustainable methods
- Uses rapidly renewable raw materials
- Uses natural, organic, or minimally processed material
- Manufactured within 500 miles of use, thus minimizing the energy impact of transporting goods
- Ensures extraordinary durability and long-term effective function, eliminating a need for replacement
- Manufacturer has performed a lifecycle assessment of the product
- Product is recyclable at end of useful life (cradle to cradle design)
- Product is biodegradable
- Provides an effective alternative to a hazardous material
- Reduces storm water pollution
- Reduces pollution from waste
- Can the product be maintained without introducing harmful chemicals into the environment
- Manufacturer has made a commitment to sustainability (energy efficient; resource conservation)
- Manufactured in a sustainable, socially just fashion, with concern for worker health and safety
- Manufacturer has made a commitment to green business practices
- Certified by as "green" by a recognized authority:

# **HARD SURFACE FLOORING PRODUCTS: WOOD, BAMBOO, CORK, LINOLEUM**

(Note: also see section on TILE for ceramic floor tiles)

## **Eco-Timber Flooring**

*Meets the highest standards for a “green” hardwood floor. High quality bamboo flooring and hardwood from Forest Stewardship Council (FSC) certified forests. Engineered floors all created with formaldehyde-free adhesives.*

## **Marmoleum**

*Once known as “linoleum”, marmoleum is a natural flooring product made from linseed oil, wood flour, rosin, jute, limestone, and pigments. Available in floating planks or glue down sheet and tiles.*

## **Pacific Blue Flooring**
